

Ideal for both new build and refurbishment alike **SSP. Specialised Sports Products Ltd** supply and install wet pour rubber and synthetic turf systems. The company also has an extensive synthetic surface maintenance division. The company has recently added mobile sport courts and children's play equipment to its range of products and services.

Authority: The company is a member of the Sport and Play Contractors Association (SAPCA). All safety surfaces are tested in accordance with European Standard BS EN 1177(1998) and installed in accordance with BS- EN 1176-7:1997.

Green Issues: SSP Systems are designed to have little impact on their surroundings and environment. Elements of all systems used are recycled with environmentally friendly products used where possible.

Applications: SSP Sport Systems consist of a range of artificial turf or rubber surfaces for a range of sports including football, hockey, tennis, golf, cricket and bowls. The company incorporates both sport and educational aids under its Multi Education Games Area (MEGA) surfaces designed to replace traditional school playgrounds.

SSP Children's Safety Surfacing offers tested Critical Fall Heights for areas requiring a dedicated safety requirement for children's play and play equipment. The range includes wet pour

rubber of various thicknesses and the ProPlay Artificial Grass Safety Surface.

SSP Children's Play offers systems to create fun, hard wearing, clean, most weather use, outdoor play grounds and recreational areas. A range of artificial grass is available to transform muddy natural turf areas to create areas of all weather play with a natural turf look. Traditional tarmac can be transformed by colourful wet pour rubber or synthetic turf.

SSP Multi Education Games Areas (MEGA) are designed to be an interactive system for sport, teaching and play. The MEGA concept area is used to develop existing and new outdoor spaces providing a variety of learning, recreational and sports facilities and a place for children to grow and develop.

SSP Civil & Commercial Systems are used for roadside verges, roof gardens, roundabouts and recreational areas. Artificial grass can be used to replace natural turf in such applications reducing mowing costs, traffic disruption, and watering.

SSP Domestic Lawns can be created using a selection of synthetic turf. Artificial lawns solve problems associated with wear, maintenance and watering offering low

maintenance and high durability in areas in repetitive high use for children's play or domestic pets. Aesthetically rewarding the surfaces are ideal for enhancing properties, retirement homes and areas of shared access.

SSP Mobile Sport Courts are semi permanent sports surfaces available with the X-Treme Ball Court System designed to be used by schools, sports clubs, and sponsors to provide a heavy duty but mobile sports surface.

SSP Exhibit are a range of surfaces used for displays, garden parties, exhibitions, and promotional advertising.

SSP Synthetic Surface Cleaning & Maintenance Services are available for most synthetic surface. The company offer rejuvenation, renovation and chemical treatments to areas such as full sized synthetic sports surfaces, tennis courts and children's play areas. Regular

maintenance and regular maintenance contracts are available.

Performance: Weather SSP Synthetic Surfaces are unaffected by extreme weather environments such as continual exposure to water, cold and heat.

Mechanics: All products perform to the industries required tests of strength, durability, and fire ignition.

Sitework: Installation All installation work for Children's Safety Surfaces is in accordance with BS- EN 1176-7:1997. Elements of the installation process can involve excavation with an aggregate base installed or onto existing hard, sound porous surfaces.

Guarantees: All materials are guaranteed against manufactured faults. Further warranty information is available upon request.

Services: A full design and installation service is available. Maintenance contracts are available for SSP installed surfaces as well as those installed by other companies.
