SSP IMPACT ABSORBENT SURFACES FOR PLAY, SPORT & LEISURE

SPECIALIST & RUBBER SURFACES FOR:

SOFT PLAY • CHILDREN'S PLAY • CHILD SAFETY
SPORTS PLAY • LEISURE • GARDEN ENHANCEMENT

RUBBER TILE SURFACES

SSP RUBBER TILE PLAY SURFACES

SSP Play Tiles provide an alternative rubber safety and impact surface commonly used in children's playgrounds, golf courses, stables and patios. The standard tiles are moulded with a shrinkage allowance and will measure one metre square in size and provide a consistent factory guaranteed thickness with a +/- 2mm tolerance. The tiles will not crumble over time, are hard wearing, and are relatively simple to install. SSP Play Tiles are also available in 500mm x 500mm.

The standard tiles are manufactured from milled, sieved and graded Styrene Butadiene Rubber (Black) in reclaimed truck/lorry tyre shred form, bound together using a 10% ratio of

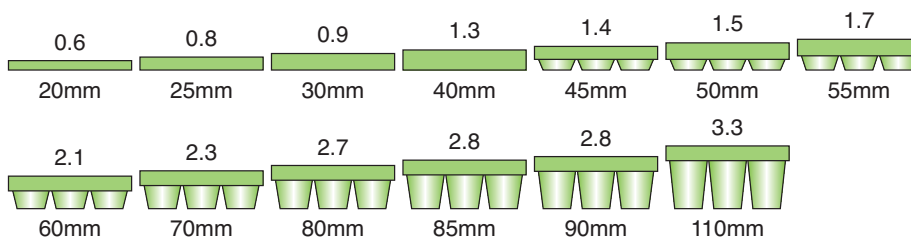

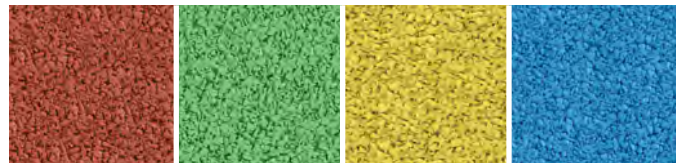

moisture curing Polyurethane Pre Polymer. All tiles are pressure moulded using the same shred material. The top surface on all the range from 20mm – 110mm thick is identical, having a smooth top surface with a 5mm x 45 chamfer around the perimeter and are visually divided into four using a 'V' chamfer across the centre – commonly known as a cruciform. All play tiles over 45mm thick feature a large hollow cone foot formation which has been tried and tested and should not be mistaken for the old failed 'egg box' design. SBR tiles are available in Black, Red and Green.

SSP Play Tiles can be surface mounted, where a good sub-base is already available, with the perimeter tiles having ramped and corner edges to taper down the surface to the sub-base. Standard tiles have a flush finish.

Rubber compounds are not guaranteed against staining. It is possible that a black carbon release may occur as the tiles age and during hot spells.

EPDM topped tiles are available in standard colours of Red, Blue, Green and Yellow. Other colours are available. Unlike standard play tiles the EPDM range does not wear blacker in time on heavily used areas as each tile is topped with virgin through coloured granules providing a more permanent colour.

Rubber mushrooms, mushroom tops, spinning mushrooms, table tops and spinning discs are also available.
