

SSP SYNTHETIC SPORTS SURFACE GENERAL MAINTENANCE EQUIPMENT

3G Grooming Unit (Ref: DCR)

The 3G Grooming Unit comprises of a spring tine and nylon brush system complete with adjustable height on all four wheels. Rear wheel jack down for transport and storage. Specifically designed for regular grooming and maintenance.

Working Width: 1300mm
Overall Width: 1740mm

Synthetic Surface Towable Sweeper (Ref:HSTS98)

The sweeper benefits from a sprung floor to allow infill to be evenly redistributed back onto the surface whilst collecting surface debris. Metal gear system allows the brush sweeper to be driven by the wheels. Adjustable brush head height.

Working Width: 915mm
Overall width: 1350mm

Rotary Pedestrian Brush (Ref:RRB)

Four section rotary brush powered by a 5.5Hp Honda engine via a twin V belt drive. Adjustable brush height and clutch. Tow bar conversion to allow the unit to be towed.

Working Width: 760mm
Overall Width: 1150mm

Triangular Brush (Ref:TMB)

Nylon bristle triangular drag brush complete with easy transportation wheels. Ideal for regular drag brushing of surface to help keep infill decompacted and evenly distributed over surface.

Working Width: 1500mm

Drag Mat (Ref:DM)

Mild steel construction drag mat for synthetic filled sports surfaces. Specifically designed edges to safeguard any tearing of the surface. Complete with towable attachment.

Working Width: 1220mm
